PROFILE

Revenue Growth Management consultant with 4+ years at NielsenIQ in FMCG pricing strategy, promotion optimization, Price Pack Architecture, trade investment and mix management, within 7+ years of total experience. I advise global FMCG clients across Asia, the Middle East and Eastern Europe, turning price elasticity, sales decomposition and simulation outputs into clear pricing and promotion decisions that protect margin and grow share. I bring AI tools into everyday analysis so recurring work runs faster and with fewer errors.

4+ years in RGM at NielsenIQ	**7+** years of total experience	**30+** pricing & promotion projects	**3** regions: Asia, Middle East, Eastern Europe

EXPERIENCE

NielsenIQ
MAY 2025 – PRESENT

Consultant, Analytics RGM

- Lead price and promotion analysis across FMCG category portfolios, using price elasticity, sales decomposition, ROI analysis and simulation scenarios to guide pricing and promotional decisions.
- Recommend price-change magnitudes, optimal promo depth, promo pressure and which promotional mechanics to invest in versus eliminate for global FMCG clients.
- Generate insights that help clients gain market share, compete with private labels, improve margins and drive profitable sales uplift.
- Benchmark competitive pricing and channel positioning across Modern Trade and Traditional Trade to shape market share and revenue growth strategies.
- Automated Python-based client file generation with AI tools, cutting processing time by **~80%** and reducing manual errors.

NielsenIQ
MAR 2022 – APR 2025

Analyst, Modelling RGM

- Supported **30+** pricing and promotion projects across Asia and the Middle East, delivering store-, channel- and category-level insights through Power BI dashboards and NIQ Revenue Management Optimization tools built on statistical regression models.
- Built cross-client benchmark dashboards from historical pricing, promotion, channel and sales data to identify sales uplift and promotional effectiveness opportunities.
- Automated and optimized key recurring processes, cutting execution time by up to **40%**.
- Reached platform proficiency **30%** faster than benchmark, enabling earlier deployment on client analytics projects.

Thomson Reuters
JUN 2019 – MAR 2022

Research Analyst

- Researched and interpreted complex tax laws and regulations across multiple jurisdictions, keeping regulatory content accurate for global products.
- Maintained regulatory content through systematic validation, documentation and data management, ensuring accuracy, consistency and compliance.
- Aligned methodologies with cross-functional teams to deliver high-quality, compliant outputs.
